Appendix P

Unauthorized Access Prevention Plan

September 2020

Plans to prevent unauthorized access to and along the Project right-of-way (ROW) include the following:

- a. Posting signs at the ROW edges in those locations where the ROW intersects public roads (see Figure 1).
- b. Performing outreach to educate and inform the public concerning the risks and impacts of unauthorized access.
- c. Working with local law enforcement officials in an effort to prevent future trespassing.
- d. Identifying construction and material details of gates and berms.
- e. Identifying existing and proposed gate locations on the Plan and Profile drawings. Final determination of locations of gates and berms shall be made during post-construction assessment of the Facility, in consultation with and acceptance by Department of Public Service Staff, New York State Electric & Gas Corporation (NYSEG) and, where applicable, New York Power Authority.
- f. Coordination with NYSEG defining applicable individual and shared responsibilities for ROW access as defined in the approved Easement Agreement.
