

NextEra Energy Transmission New York, Inc.

(NEETNY)

Empire State Line

Case 18-T-0499

Appendix Q

Roadway Crossings and Highway Work Permits

June 2020

Purpose

This Appendix identifies the Highway Work Permits and Use and Occupancy Permits for the highway and road crossings associated with the NextEra Energy Transmission New York, Inc. (NEETY) Empire State Line Project (ESL).

Copies of the permits are not included in this Appendix because applications have not been submitted to the jurisdictional agencies. Applications and supporting documentations will be submitted to the agencies prior to the commencement of construction. Supporting crossing exhibits and Certificates of Insurance will be required to support applications to the respective agencies. Copies of the permits will be incorporated into this Appendix once issued.

A summary of the meetings and communications with the transportation agencies, which demonstrates current efforts of coordination, can be found in Appendix H – Permits and Approvals, Agency Correspondence, and Notifications. Maintenance and Protection of Traffic Plans for road ROW encroachments are included in Appendix R – Roadway Crossings and Highway Work Permits.

HIGHWAY WORK PERMITS

ESL – Transmission Lines: Highway Work Permits

Tables 1 through 3 list the State, County and Local road crossings identified on the EM&CP Plans for the ESL.
